

An Augmented SAP Solution for Supply Chain and Maintenance businesses

HRC Software provides ready to use Web and Mobile applications for Spare Parts, Warehouse, Maintenance and Procurement business.

Challenge

Empower end-users with a user-friendly, efficient & reliable mobile suite of applications to cover their business needs (Traceability, Productivity, Quality, Security).

Harness the full value of SAP while keeping its core clean, leverage your mobile device capabilities to their full potential.

Deploy cost-effective, easy-to-use, SAP-integrated solutions.

Solution

Built on Neptune DXP, HRC Software's solution provides web and mobile applications to manage Supply Chain (SAP WM, SAP HUM, SAP EWM), Maintenance (SAP PM) and Procurement processes.

Allows customers to fully integrate SAP documentation (SAP GOS, SAP DMS) within the process and adapt to their strategy with deep-linking between apps.

Results

A solution that prevents errors, creates high productivity, and perfect traceability. Increases end-user engagement with easy onboarding and time-saving benefits from an SAP augmented experience.

And only a 24-hours turnaround time to install HRC Software applications.

HRC Software Solutions by the numbers

Founded in 2010 and located in Lyon, France

Provides web and mobile applications that are SAP ECC6 & S/4 compliant

More than 50 mobile applications created

75% time saving in processes for customers

Neptune Software Bronze Partner

Challenge

Provide real-time solutions that offer the best traceability

Until very recently, field workers could not benefit from all the innovations that information workers have enjoyed for years. Instead, field workers were dealing with double input processes and frequent round trips to a (shared) desktop computer where input quality, productivity, traceability and, in the long run, both collaborator and management satisfaction were suffering.

Yet, logistics, maintenance, and procurement processes are fundamental to running other business processes such as production seamlessly.

Companies needed to find a way to offer a real-time solution, fully SAP-integrated, easy to use, and highly efficient to cover all business needs. However, finding a solution that also offers user-friendly applications to guarantee users adoption is always a challenge.

Solution

Ready-to-use applications built from best practices and end-user feedback

HRC Software provides ready-to-use applications to cover Supply Chain, Maintenance and Procurements business processes.

Their suite of web and mobile applications, built on and powered by Neptune DXP, have been designed and built by focusing on end-users and continue to evolve in an industrial context. Hence, the applications are optimized for industrial devices (PDA and tablet), meaning devices capabilities (offline, APN, GPS, NFC, vibration, etc.) are leveraged to their full extent.

HRC Software strongly believes that real-time, easy-to-use, SAP-integrated solutions are essential to engage end-users and provide the best response to business needs.

Results

Augmented SAP solutions, mobile application deployed in weeks, and users fully engaged

Anyone can install the HRC Software suite of applications within 24 hours without additional infrastructure cost. End-users can also master the whole suite of applications within a few hours and move on to focus on what's most important – their mission-critical activities.

"Our job is to offer our customers solutions to cover their supply chain and maintenance processes. We have therefore developed ergonomic, high-performance, plug and play applications on SAP, installable in 24 hours and without additional infrastructure costs. This will allow our customers to benefit from this added value as quickly as possible," explains Cyril Vernet, Partner HRC Software.

Customers can harness the full value of these real-time, SAP-integrated solutions in days!

"We offer an end-to-end model to support our clients on the whole mobility aspects (devices selection, global architecture, security, devices management, and more)."

Cyril Vernet, Partner at HRC Software

What do customers say?

“We are actively participating in efforts to relocate the industry to France, and to remain competitive, we must modernize: **HRC Software's mobility program met our ambitions. We are now able to trace products in real time while removing unnecessary and time-consuming intermediate steps,**” states Alexandre Gultzoff, CIO at Seqens

“With more than 23,000 items of equipment to manage and 10,000 items in stock, spread over 5 stores, these mobile applications were eagerly awaited. **The HRC Software team have designed and developed applications capable of optimizing the daily lives of our field operators in order to facilitate data transmission, reduce the risk of errors and save time on tasks previously managed manually,**” explains Marianne Maurice, Operational Effectiveness Leader at Seqens

SEQENS

The main advantage is being able to do several orders at once and enter them the moment they are being completed without having to go back to your PC. A huge time saver!

Jérôme, Warehouseman

"Above all, these applications have brought us speed and significant time savings in the field. Because stock gets updated immediately, you can see real efficiency even in remote sites."

Thibault, Warehouseman

Key Takeaways

Large business coverage (Spare Parts, Warehouse, Maintenance, Procurement)

Mobile applications certified by Zebra

End-to-end approach

End users centric and ECC6 & S/4HANA ready

Installation of apps in 24 hours

About HRC Software

HRC Software is an HRC Group company dedicated to desktop, and mobile solution software publishing focused on SAP industrial context. Our will is to offer the best solution to customers to harness the full value of SAP. From install to use, simplicity is key. Our motto? “Keep it simple!” to facilitate change and users membership.

About Neptune Software

Neptune Software is a rapid application development platform vendor with more than 600 enterprise customers and over 3 million licensed end users globally that empowers IT departments to deliver tangible business outcomes. Neptune Software offers with its Neptune DXP, a leading low-code, SAP-centric, enterprise app development platform to digitize and optimize business processes and user interfaces – at scale and with ease. Neptune DXP provides a fast and cost-effective way to industrialize the development of custom applications - saving companies time and money on development, integration, and operations. www.neptune-software.com
