

# CUSTOMER Fact Sheet

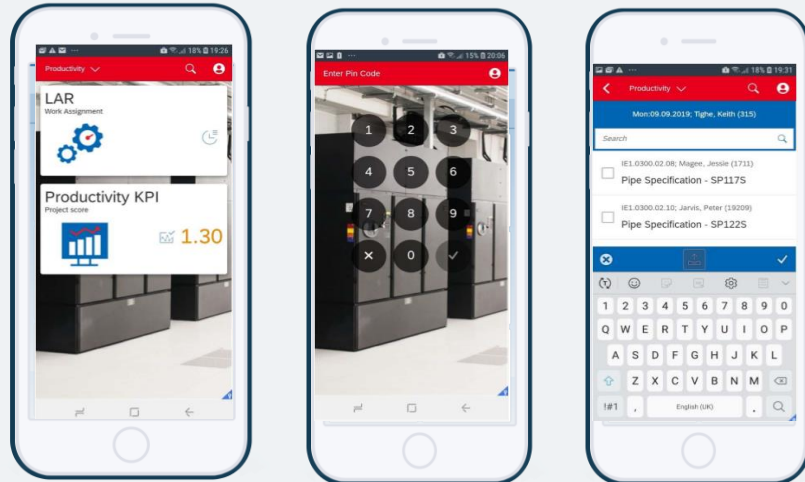

## CONSTRUCTION

Leading European Contractor

**Mercury** is an Irish contractor who build and manage complex engineering projects that reimagine how people work and live in the built environment

**Mercury** uses Neptune Software as a site productivity tool designed to facilitate labor allocation on site and time recording, as well as connecting with their ERP

## PROJECT Details

### GOALS & CHALLENGES

- Site managers are not always technical, so the apps needed to be very simple
- Needed integration with their existing ERP
- Usable on any device and available offline
- Solution needed to involve vendors and sub-contractors
- Needed to be cost effective and delivered quickly

### RESULTS

- More accurate data capture and logged in real-time
- Site teams are made more commercially aware
- Staff see the technology as being helpful as opposed to a hinderance
- Provides better data for future bids and areas of improvement
- Able to justify changes to scope/fee's

### TECHNOLOGY DETAILS

- SAP ran
- Bring your own device policy

### EFFORT, DURATION & TIMELINE

- Duration: 4 months
- Partner: Client Solutions
