API FACTORY – TELL ME MORE!!

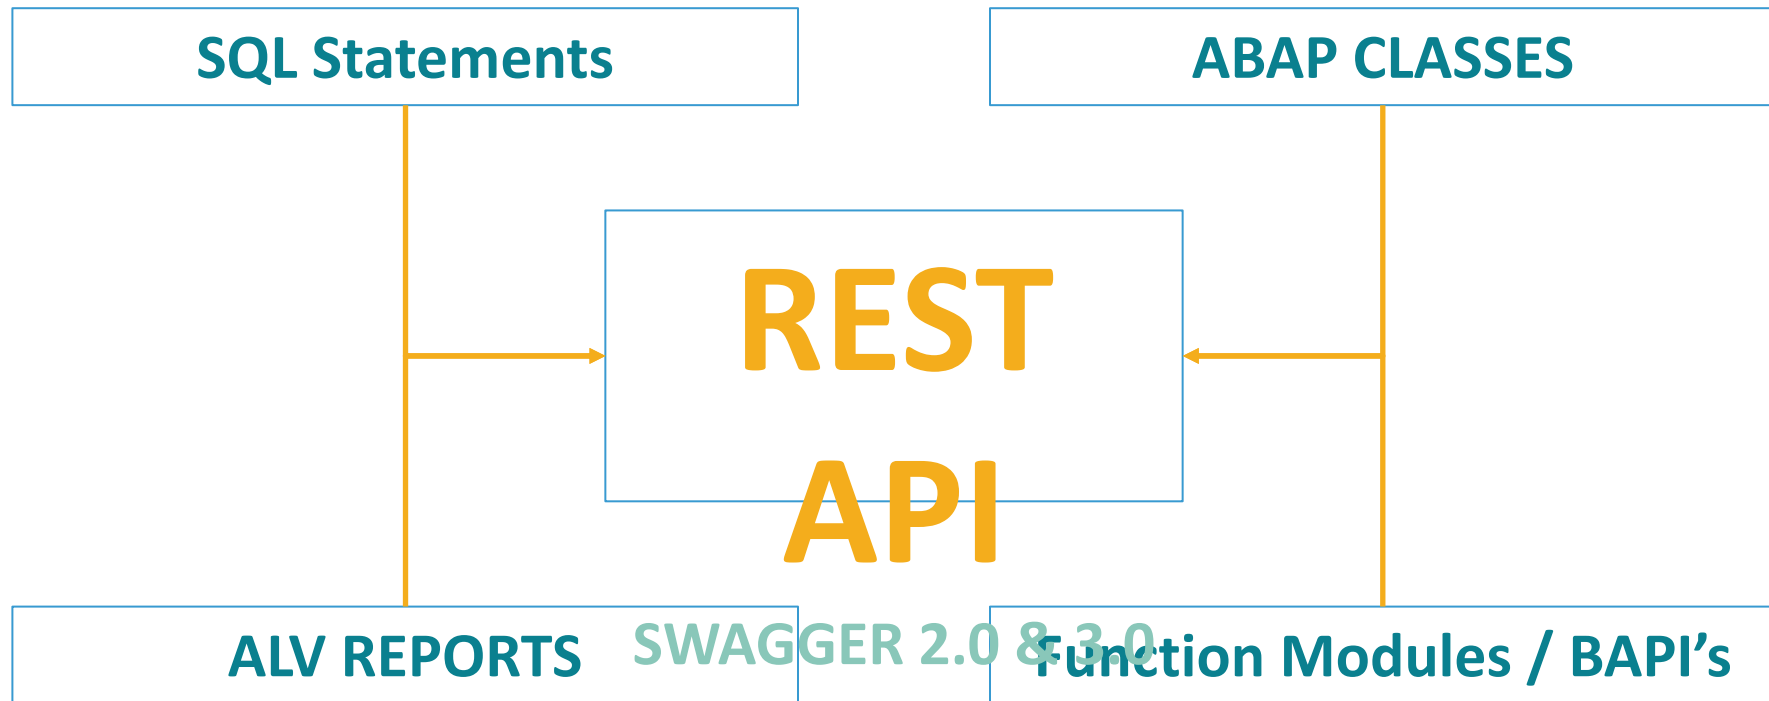

## API FACTORY

New key component within DXP to provide access to all business functionality “locked up” in your ERP | S/4 system in a secure and reliable fashion to:

- Integrate with other systems (e.g. SAP solutions with a non-ABAP technical stack), provide users access to this business functionality via UI5/Fiori UX
- Develop new (mobile) solutions that combine this business functionality with other data/services
- Tech Speak: expose all ALV, reports, function modules as RESTful APIs - technical underpinning to develop data-driven apps and (CDS!) analytical integration cards
